

Valentine Origami Heart Ring

Written By: Julie Hudy

TOOLS:

- [Origami Paper \(1\)](#)

Step 1 — Valentine Origami Heart Ring

- Here's what the finished ring looks like.

Step 2

- Start with one piece of origami paper.
- Place it color-side down.
- Fold in half, then unfold.

Step 3

- Turn and repeat. You should now have a "+" in your paper.

Step 4

- Fold each side to the center. It will look like doors being closed.
- Unfold. Your piece should look like Picture #2.

Step 5

- Take the edge and fold it to the first fold you made before (Picture #1).
- Do the same with the opposite edge (Picture #2).

Step 6

- Fold one edge over to the second crease from the opposite edge (Picture #2).
- Repeat with the opposite edge.
- The outcome will be the paper being divided equally (Picture #2).

Step 7

- With the colored side up, fold back the top segment (Picture #1).

Step 8

- Fold the top left point to the center of the paper, similar to an airplane fold (Picture #1).
- Repeat on the other side (Picture #2).

Step 9

- Turn over (Picture #1).
- You are going to fold down on the line shown (Picture #2).
- Fold down (Picture #3).

Step 10

- Turn over (Picture #1).
- Fold point back (Picture #2).
- Repeat on other side (Picture #3).

Step 11

- Unfold both sides (Picture #1).
- Now you are going to open and fold. Pull open the folded piece and push upwards (Picture #2).
- Repeat on both sides (Picture #3).

Step 12

- Fold point down toward center (Picture #1).
- Repeat on both sides (Picture #2).

Step 13

- Fold up bottom fold (Picture #1).
- Fold up again (Picture #2).
- One last time (Picture #3).

Step 14

- Turn over (Picture #1).
- Now you are going to make it into a ring. The small tab is where you will insert the other end of paper (Picture #2).
- I find this part to be a challenge. Just keep rolling and working the paper until it looks like Picture #3.
- You've done it!
